

PDUX4

Datasheet

The PDUX4 is a high-performance solid state power distribution unit with a total of 48 powered output channels and maximum current capacity of 350A.

This includes 10 flexible output drivers which may be configured as high side, low side, or high side PWM, with the ability to soft start electrical loads with closed loop current limitation.

Using logical or numerical inputs from its 16 analogue inputs or from any of 3 CAN buses the PDUX4 is calibrated using a clear graphical interface with full logic simulation ability and live monitoring.

The PDUX4 is able to operate in a low power standby state, drawing <math><2\text{mA}</math>, with configurable activation based on physical or CAN input.

Additionally, the PDUX4 may be paired with a Life Racing ECU to expand input and output functionality through the 'slave-link' feature.

Multiple variants of the PDUX4 are available – 12V/350A, 12V/200A and 24V/300A – as detailed in the 'Ordering Information' section.

Features:

- Schematic based calibration including logic simulation tool
- Numerical arithmetic including handling of analogue inputs
- Fully custom CAN across 3 buses including mux frames and retransmission (gateway), configured with the help of a graphical display and import/export tool
- Low power state woken on physical input, CAN activity, or specific CAN frame
- Optional I/O slaving to an LR ECU

Outputs:

- 48 main Power Outputs
 - 10 multifunction high side, low side, high side PWM (fixed 20kHz) outputs (40A continuous, soft-start inrush limiting 40A, hard-start inrush 60A)
 - 10 high side outputs (40A continuous, hard-start inrush 60A)
 - 28 high side outputs (15A continuous, hard-start inrush 17.5A)
- Output linking ('teaming') to support very high current devices
- 4 additional low side outputs (125Hz PWM)
- All outputs short circuit and thermally protected with multi-stage in-rush control
- All outputs additionally protected by physical fuses as required by worldwide regulations
- Combined diagnostic output with reset input
- 128 scalable CAN ('soft') outputs
- Custom datastream (CAN) – i.e. customisable channel current, channel state and device information

Inputs:

- 16 physical switch / analogue sensor inputs including software selectable 3k ohm pull-up resistors and 4x inputs capable of programmable "wake up" functionality
- Analogue inputs may be transformed into engineering units for use in schematic
- Dedicated wake pin
- 128 CAN 'soft' inputs with configurable scaling, validation and debounce time

Interfaces:

- 2x 100Mbit/s full duplex Ethernet (can be used as Ethernet switch)
- 3x CAN 2.0B – fully flexible
- *Option for galvanically isolated CAN bus (custom projects only)*
- *RS232C serial interface (custom projects only)*
- *LIN Bus (custom projects only)*

Power Supply:

- 6V to 20V input voltage (12V option) or 6V to 30V input voltage (24V option)
- Dedicated logic power input
- Regulated 5V sensor supply output with full circuit protection

Sleep State:

- Low power standby state with configurable wake options:
 - Wake by voltage signal (1.6mA)
 - Wake by any CAN activity (CAN1 only) (2mA)
 - Wake by specific CAN frame (two frames required, CAN1 only) (2mA)
 - Wake by CAN specific CAN frame with low latency (one frame required, CAN1 only) (10mA)

ECU Slaving:

- Allows a Life Racing ECU to “claim” unused pins across a dedicated CAN bus utilising the following PDU I/O:
- Outputs 1..10 with additional functionality including H-Bridge pairing and configurable PWM frequencies
- Low Outputs 11..14 with configurable PWM frequencies
- All 16 inputs, including 8 frequency capable (4 optionally bipolar), and all with software selectable 3k ohm pull-up resistors

Physical:

- 2 Leavysal connectors with a total of 113 pins
- Amphenol SurLok Power Stud
- Machined Aluminium enclosure
- 210x130x57mm (including connectors)
- 1090 grams
- Operating Temperature -40C to +85C

Ordering Information:

Description	Part number
PDUX4 350A (10mm main power stud)	PDU-C02
PDUX4 200A (8mm main power stud)	PDU-C05
PDUX4 350A 24V (10mm main power stud)	PDU-E02
PDUX4 200A 24V (8mm main power stud)	PDU-E05
PDUx 350A Connector Kit	CON-B10
PDUx 200A Connector Kit	CON-B11
